WML-Somalia- water project presented by MD101 for NSR

Lions Clubs is helping tens of thousands of people in Somalia with water.

People and animals in Somalia will have a better life.

Background and Purpose

Tens of thousands of people and animals in Bari Region Somalia will get better life condition and a chance to live their home regions without fear of fleeing because of lack of water.

The goal is to drill at least 5 boreholes in an area of 500 km long.

Deep boreholes.

This is Beeliwacatay- first borehole in Bari Region Somalia

This is Hamure - second borehole in Bari Region Somalia

After we found water. We started constructing water supply system.

Hamure borehole

Inauguration and handover ceremony

Again delegates from the local government attended the hand over ceremony.

Long-term solution- with clean water people do not need to immigrarate

Happy local inhabitance

Lions always engages the local Lions Clubs and Water Authorities

To: Lions Clubs International MD101 Sweden and the LCIF

Subject: Satisfaction letter of Drilled Borehole at Hamure

The Puntland Water Development Agency would like to acknowledge for the completion of the drilling activities in Hamure Village of Bari Region.

According to the technical borehole completion the technical, the new borehole in Hamure Village which has sufficient water average yield of 18 meter cubic per hour. Therefore, The Puntland water development agency (PWDA) appreciates the support of the Lions Clubs International MD101 Sweden and the LCIF on the development of water infrastructure in Puntland and this intervention has come at the right time, especially when community is in dire need to safe drinking water due to the looming drought in the area and surrounding locations.

The Puntland water development agency also recognizes that the borehole was successfully completed with sufficient yield and good water quality based on Puntland context.

Finally, PWDA is indebted and grateful for LCI's close collaboration and partnership on this project and beyond. The government of Puntland also wishes from Lions Clubs International MD101 Sweden and the LCIF to continue water sector support of vulnerable communities in

Puntland.

Best regards

Mohamed Abdulkadir Mohamed

Development Agency (PWDA)

Agreement was made with water ministry for future maintenance

This water project is in line with LCI priorities

Lions Clubs Internationals priorities

Project is directly related to Lions Clubs Internationals priorities in areas of assistance. The project is directly related to two of Lions Clubs International's focus areas;

- 1. Focus area Relieving famine, which means, among other things, that substandard food must be combated.
- 2. 2. Focus area Protect our environment which, among other things, focuses on problems caused by poor drinking water.

WML 4.0 - Fourth borehole as a NSR project

Lions MD 101 is recommending NSR to own/takeover the MD101 Water project in Puntland, Somalia for drilling and construction of water supply system for a total of two boreholes in the area.

After implementing the these two boreholes more than 25.000 people and their animals will directly or indirectly will benefit the water. People will also have the opportunity to grow vegetation.

Project budget with LCIF Grant. MD101 will give extra support to the project as it indicated in the income.

Total cost for one bore hole- drilling, equiping with water supply system	Amount \$
Drilling up to 400 metres	157.000\$
Proct cost, including transactions cost, transport, accommodation	15.474\$
Totalt cost for one complete bore hole with a capacity of serving 10-15.000 people . Financing the project	172.474 \$ USD
Income	USD
MD101 Sweden	19.037\$
NSR	67.200\$
LCIF	86.237\$
GRAND TOTAL:	172.474\$
